(a) In the event that application for payment has been made with respect to more than four farms in the county and/or in the event that cotton or tobacco is grown or diverted in 1936 on a farm with respect to which application for payment has been made, enter the data for determining the amount of class II payments and soil-building allowance for such farms in the table provided therefor on form WR-12-B. The entries in this table must be determined in accordance with the procedure set forth in subsection 6, section 32, part IV of this bulletin.

(b) In the event that four soil-building practices were carried out on a farm in 1936, such practices should be reported in table II on form WR-12 in the columns beneath the line provided for reporting work sheet serial numbers, and in such case the parallel lines separating "work sheet serial numbers" should be deleted on the first line where the work sheet serial number of the farm upon which four soil-building practices were carried out should be entered.

Part V. Instructions for tabulation of information from forms WR-10, WR-11, and WR-12.

SECTION 47. *General Information.*—As previously indicated form WR-10, Report of Performance, will be filled out in triplicate, one copy to be retained by the producer, one by the county committee, and one copy to be retained by the State committee.

Forms WR-11 and WR-12 will be filled out in duplicate, one copy to be retained by the county committee and the original copy to be submitted to the State office for audit and disbursement.

At the time the first consignment of forms WR-10, WR-11, and WR-12 are submitted to the State office by the county committee, the county listing sheet shall be returned to the State office if this listing sheet has not been returned previously. As soon as the county listing sheet has been returned to the office of the State committee, each column shall be carefully checked to determine whether or not the county committee has met the requirements of the State committee with respect to base acreages, yields of soil-depleting crops, and indices of productivity. If it is discovered that the county committee has not met such requirements and that the base acreages, yields, and/or indices of productivity recorded on the listing sheets and on the applications for payment are not in accordance with the requirements of the State committee, the listing sheets, reports of performance, and applications for payment shall be returned to the county with instructions necessary for making the proper corrections.

SECTION 48. *County Listing Sheet for Audit Section.*—As soon as the county committee has made the necessary adjustments to meet the requirements of the State committee in all particulars, there may be prepared in the office of the State committee a copy of the data on the county listing sheet which will be needed by the Audit Section. For this purpose a county listing sheet may be prepared as follows, with only the columns indicated being filled in:

Column 1. *Serial number of work sheet.*

Column 2. *1936 operator.*

Column 3. *Owner.*

Column 24. *Total soil-depleting base as corrected to meet county limit.*—In many counties column 24 will not have been filled out previously, but corrections and adjustments made by the county committee will be recorded in columns

22 and 23. In column 24 should be entered the finally adjusted total soil-depleting base for each farm and the total of the items in this column for the county should be checked to determine whether this total exceeds the total of the soil-depleting bases as established by the State committee.

Column 25. *Cotton soil-depleting base.*—Enter in this column the finally adjusted cotton base for each farm and ascertain whether or not the total of the items in this column exceeds the limit as established by the State committee.

Column 26. *Tobacco base.*—For the few counties in the Western Region where tobacco bases will be established, the tobacco base should be entered in column 26.

Column 36. *Flax yield.*—Enter in this column the flax yield in bushels which has been established for the farm by the county committee and approved by the State committee, i. e., it must be ascertained whether or not the weighted average of the yields in column 36 comes within the limits for average flax yields on participating farms as established by the State committee.

Column 39. *Cotton yield.*—In this column should be entered the finally adjusted cotton yield for each farm. It should be ascertained whether or not the weighted average of the items in this column exceeds the county average yield established by the State committee.

Column 43. *Productivity index.*—In this column should be entered the productivity index finally established for each farm by the county committee in accordance with instructions of the State committee. It must be ascertained whether or not the weighted average of the indices in this column exceeds 100 percent and, if so, whether or not the average exceeds any limits which may have been set by the State committee taking selectivity into account.

The United States Maritime Commission, acting pursuant to the authority conferred upon it by the Merchant Marine Act of 1936, particularly Title VI thereof, and finding that Regulations for filing applications for operating-differential subsidies are necessary and appropriate to carry out the provisions of said Act, hereby adopts the Regulations for filing applications under Title VI of the Act, which have been promulgated this day.

By order of the United States Maritime Commission.

TELFAR KNIGHT, *Secretary*.

DECEMBER 29, 1936.

[MC Reg. No. 3]

REGULATIONS

By virtue of the authority vested in the United States Maritime Commission by the act entitled, "An Act to further the development and maintenance of an adequate and well-balanced American merchant marine, to promote the commerce of the United States, to aid in the national defense, to repeal certain former legislation, and for other purposes" (Act of June 29, 1936, Public, No. 835, 74th Cong.), and in

order to establish uniform procedure under Title VI of said Act, particularly with reference to application for operating-differential subsidies thereunder, the following Regulations are hereby prescribed:

ARTICLE I. *The Application*.—(a) The Commission will consider the application of any citizen of the United States for financial aid in the operation of a vessel or vessels which are to be used in an essential service in the foreign commerce of the United States when such application is made in accordance with the requirements herein specified.

(b) Every application for an operating-differential subsidy shall be accompanied by statements disclosing the names of all persons having any pecuniary interest, direct or indirect, in such application, or in the ownership or use of the vessel or vessels, routes, or lines covered thereby, and the nature and extent of any such interest.

(c) Every application shall identify the applicant as a citizen of the United States. If the applicant is a corporation, partnership, or association, it shall aver that it is a citizen of the United States within the meaning of Section 2 of the Shipping Act, 1916, as amended (U. S. C., title 46, sec. 802).

(d) Every application shall further identify the applicant by stating (1) its name, (2) the address of its principal place of business, (3) the type of business unit in which it is organized, (4) the state of its origin, and (5) the nature of the business in which it is engaged.

(e) Every application shall be submitted over the signature of a responsible official of the applicant. Such official shall make oath that the representations of fact contained in the application were either prepared by him, or were prepared at his direction and under his supervision for the purpose of making the application, and that such representations are true according to the best of his knowledge, information and belief. Such official shall further state that the application is submitted in behalf of the applicant pursuant to the terms of the Merchant Marine Act of 1936; that he has read the Act and is familiar with its terms; and that the applicant is ready and willing to submit to the Commission such further information as may be required by it to the end that there may be a full disclosure of facts pertinent to the application.

(f) Any application may be supplemented by facts or data not specified by these regulations but deemed pertinent by the applicant; and any application may be supported by brief or argument. Provided, all such supplemental facts or data, or brief, shall be contained in an addendum or addenda, entirely separate and apart from the material required to be in the application.

ARTICLE II. *Service, Route, or Line*.—(a) The applicant shall describe the service, route, or line wherein it is proposed to operate the vessel or vessels with sufficient particularity to enable the Commission to understand the proposal fully. Such description shall include (1) ports proposed to be served, domestic and foreign, (2) the kinds of service and frequency of sailings proposed as to each port, and (3) the route or routes to be followed.

(b) All existing services upon the specified trade route shall be listed, and their respective owners identified as operating vessels (1) of United States registry, or (2) of foreign registry.

(c) Each existing service upon the specified trade route provided by vessels in operation under foreign flags shall be described in sufficient detail to permit a comparison thereof with the proposal of the applicant. There shall be included in such description the name of the owner or operator; the flag under which the vessel or vessels are being operated; the age, type, size, and speed of the vessels operated. The applicant shall state whether or not it considers any or all such foreign flag operation to be direct foreign flag competition, and why.

(d) If the applicant is now engaged in operation upon the service, route, or line, the effect upon such operation of any existing conference or pooling agreements shall be stated.

ARTICLE III. *Vessels*.—(a) The applicant shall state whether it owns, or proposes to build or purchase, the vessel

or vessels which it proposes to operate in the service, route, or line described. If it does not own the necessary vessel or vessels, its plans to build or purchase shall be described.

(b) The vessel or vessels which it is proposed to operate shall be listed and described. As to each vessel the applicant shall show: (1) its present ownership; (2) when and where it was built; (3) when it was documented under the laws of the United States; (4) its general particulars, such as age, type, size, and speed, having specific reference to the kind of material used in its construction, the method of propulsion, whether steam or motor, and the method of fireproofing; and (5) list of items, if any, in the nature of national defense features whereby the vessel would be suitable for conversion into a naval or military auxiliary.

ARTICLE IV. Operating Costs.—(a) The applicant shall submit a statement of the cost of insurance, maintenance, repairs not compensated by insurance, wages and subsistence of officers and crews, and any other items of expense in which the applicant believes itself to be at a substantial disadvantage in competition with vessels operated under the registry of a foreign country whose vessels are substantial competitors of the vessels operated or proposed to be operated under United States registry.

(b) If the service, route, or line for which the application is made is now in operation, the cost of such items shall be cited from immediate experience. If no such service, route, or line is now in existence, the fair and reasonable cost shall be estimated, and the basis upon which such estimate is made shall be shown.

(c) Where such cost data is available from actual experience, the statement shall include: a statement of operating results showing a detail of revenue, expense, and profit and loss for each voyage completed within the twelve months prior to the date of application; a breakdown, within such statement of operating results, of wages, subsistence, insurance, maintenance, and repairs not compensated by insurance; a breakdown, within the statement of wages, showing separately the wages paid in the deck department, the engine department, and the steward department; a breakdown, within the statement of subsistence, showing separately the subsistence cost of officers, crew, passengers, and others.

All other items of revenue and expense shall be submitted in such detail as is customary in the applicant's analysis of voyage results.

The statement shall show manning and wage scales which are standard for the applicant's vessels.

Expenditures for maintenance, and for repairs not compensated by insurance, shall cover the period of four years prior to the date of the application. The place where repairs were made shall be shown in each instance.

If indirect expenses, such as overhead, are apportioned to the voyages, the method of apportionment shall be shown. If overhead is not apportioned to voyages a statement of overhead and other indirect expenses, for the period in which the subject voyages were completed, shall be submitted.

(d) The applicant shall submit a statement of the foreign cost of insurance, maintenance, repairs not compensated by insurance, wages, and subsistence of officers and crews, and any other items of expense in which the applicant has, in accordance with subsection (a) hereinabove, alleged itself to be at a substantial disadvantage as in such subsection defined, and such cost items shall be computed for the vessel or vessels proposed to be operated under United States registry as if such vessel or vessels were operated under the registry of the foreign country or countries whose vessels are competitive as defined in subsection (a).

The applicant shall base such statement upon such information as is available to it, and shall explain, separately, the basis of the information.

Insofar as the applicant may find it feasible to do so, the information required in the first paragraph of this subsection shall be arranged in the form and detail described in subsection (c) hereinabove.

(e) The applicant shall submit its estimate of the amount of annual subsidy necessary to permit operation of the proposed service, route, or line, based on the data submitted under the preceding subsections of this Article, and within the limitations of the Act.

ARTICLE V. Financial Statements.—(a) Every application shall include the financial statements described in this Article.

(b) There shall be included the latest balance sheet of the applicant. Such balance sheet shall conform in content and style with the form specified in the Annual Report and General Financial Statement for the Calendar Year 1935 prepared for the United States Department of Commerce and published by the United States Shipping Board Bureau (Cf.: Balance Sheet, Exhibit A, pp. 12-13).

(c) There shall be included an outline of the capital structure proposed to be used in the venture by the applicant in the operation of the vessels, services, routes, or lines for which an operating-differential subsidy contract is sought. This statement of proposed capital investment may be divorced entirely from the applicant's balance sheet, but it should show the proposed allocation of capital investment to the vessels, services, routes, or lines, or other units of the proposed venture, and the method of arriving at such allocations should be explained.

The applicant shall explain the sources from which it is proposed to obtain capital, and shall show the extent to which such capital is to be borrowed or contributed.

ARTICLE VI. Form and Filing.—(a) Applications may be typewritten or printed. Paper, binders, or covers larger than 8½ x 11 inches shall not be used, except that schedules folded so as not to exceed that size may be included.

(b) Ten copies, including the original, shall be filed.

By order of the United States Maritime Commission.
